Assignment 3

Shawn Cross, Ryan Crane

October 13, 2017

1 Plan for Implementation

For this project we plan on first finding a simple block device similar to the one in the Linux Device Drivers book that will work with our kernel. Once we have found one that works with our kernel we will then add the cryptography to it.

2 Version Control Log

3 Work Log

4 Project Questions

4.1 Main point of the assignment

4.2 How did we approach the problem

4.3 What did we learn
